**TO START YOUR  
APPRENTICESHIP  
ON YOUR  
CHOSEN CAREER  
PATH.**

GM Apprentice Share will employ you directly. As your employer we then place you with construction companies who train you...

An Apprenticeship gives you hands on experience, a salary and the opportunity to gain qualifications while you work. Your training will take place in the workplace and you will go to college for one day a week.

**ON  
THE  
JOB**

Apprentice Share works with high quality, prestigious construction businesses to get you through your Apprenticeship. Depending on your chosen trade, you may gain experience in one or several construction firms, safe in the knowledge that Apprentice Share will support you throughout your Apprenticeship and you will get paid a wage at the same time.

Greater Manchester  
Chamber of Commerce  
Connect. Communicate. Create.

Get in touch to find out how the GM Chamber Apprentice Share can help you on your chosen career path.

## BENEFITS

### GET QUALIFIED

Work towards a qualification and gain knowledge and skills to succeed in your chosen industry. You will stay with the same college or training provider throughout your Apprenticeship. They will support, assess and train you on your day release.

### GET IN EARLY & GO FAR

Starting employment earlier in life means there is more potential for you to progress quickly in your career and become an industry expert.

### GET EXPERIENCE

Shared Apprenticeships mean you are likely to work with multiple construction companies on several sites. This will give you a variety of experience that most apprentices will never have and will set you apart from the crowd.

### GET A CAREER

There are new Apprenticeships available that enable you to be trained up to degree level through your employer. Forge a meaningful career from the start and your employer will support you throughout.

### GET PAID

You can earn while you learn and not have student loans and debt to worry about. Plus, you get paid while you are on holiday.

### GET CHOICE

There is so much choice within Construction and Engineering. If you do not want to be a groundworker, bricklayer or plasterer you could be a designer, civil engineer or manager. Construction and engineering companies need support staff like any business, so you could work in the site office.

Get employed - On your journey you will work for several contractors who may want to take you on permanently after your Apprenticeship. You are multiplying your chances of employment with the Apprentice Share Programme.
